

New Generation Fiber Management Panel

The **NFP** series is a new generation fiber cable management product family that provides customers a lot of versatile and flexible features and advantages. This aluminum-made panel can be 19"/23/ETSI" rack mount. The series comes with different panel heights for different configuration of termination with Hakko Opto's patented sliding adapter technology, storage and splicing. The **NFP** is an integral module for the fiber distribution frame.

Features:

- Life warranty patented removable sliding adapter design
- Swing-out tray design for good cable management
- Aluminum casing for light weight
- Adjustable 19"/23/ETSI" rack front or rear mount
- FC,SC,LC and quad LC adapters interchangeable per pair
- Front access for splicing
- Mixed drawers for termination, splicing, storage
- Bend guard limiter for patch cord entry
- On-panel or off-panel splicing selectable
- Rear side entry for incoming cable
- Lockable front door
- Compatible to outside plant (OSP) cabinets
- Destination label attached at the front door
